

Spurning:

Hvar er hægt að læra að stoppa upp fugla og önnur dýr?

Svör:**Holland:**

In the Netherlands there is a two year course offered by the Van Hall Larenstein professional University and the Dutch Association of Taxidermy.

I assume the language of the course is Dutch.

Information (in Dutch): <http://www.prepareren.nl/workshop.html>

Taksidermist is given as VET in upper-secondary schools in Norway.

I can only find one school on the Web: www.sogne.vgs.no

Being upper-secondary, it is highly unlikely education is in anything else than Norwegian.

Lettland:

We do not have any training or study course in Taxidermy in formal education system here in Latvia. Actually we have very small number of people who are occupied in taxidermy. Nearly all of them are educated as biologists. The competences needed for the taxidermy they have learned by doing.

Frakkland:

In France there is only vocational training by apprenticeship (two years studies for youngsters between 16 and 25 years old) for the taxidermist. There are only 10 students pro year. There is only one school for the theoretical courses:

Centre de formation des apprentis (CFA)

Zone industrielle des sablons bouillants

77100 – Meaux

Tél : +33 (0)1 60 09 03 63

Courses are (of course) in French
